**SECRET**DATA SUMMARIES

(S/NF/SG/LIMDIS) Following are the perceived highlights from each source.

- (S/NF/SG/LIMDIS) Source A:

-- A residential neighborhood was passed through in route to the target location on a bright and sunny day. A black modern jeep car was running along the roadway and houses were in the vicinity. A shopping center that has large glass windows (sales) and a parking lot or a used car lot which has bright colors and little flags in the area.

-- A heavy set or strong man was at the site. There is a large structure at the target location which is either a red brick building or a grid style off-white or yellow structure. This site has a high area and a low area where people walk. There is water at the site and a lot of green vegetation in the surroundings. The large grid style structure has circular portions carved out of it in design that may be filled with some water (attachments A & B). Children and perhaps a swimming pool may be found in the area. Chrome metal, people, and a short black iron fence, can be found around the site. Something is moving in a circular motion. Some people at the site are wearing helmets, head phones or head gear. Something can be announced by sound at the target location. The site is reminiscent of a type of park, arboretum, or reserve, with a water system. This facility is pleasant and may serve an environmental or community purpose.

- (S/NF/SG/LIMDIS) Source B:

-- The major aspect of the target is a tall, curving wall within a large, flat area reminiscent of a plaza (attachment C). The surface of the "plaza" is very flat and consists of two or three alternating colors. The curving wall sits near a raised, circular object or structure. A gold or brass colored feature occurs within the center of the raised structure; it "feels"

metallic and may be associated with the sun in some manner. There is a sense that swirling water occurs nearby and associated with this grouping.

-- This target feels associated with the concept of some sort of memorial or specific dedication as well as that of "austerity" and "solemnness". There is a fresh, green and damp smell associated with the target.

-- There is the concept of "being capped off" associated with the target. There is a curving "drop off" area or feature at one end of the wall/plaza/raised circle complex.

-- There is a series of other curving and cylindrical objects (attachments D & E). There is a solid, tilting feature reminiscent of a tilted or curving concrete walkway. There is a series of triangular-shaped features which are attached to one another like a row of house gables.

-- There is music in the background and people are moving unhurriedly; i.e. strolling. There is a hard, black and solid winged-shaped object reminiscent of the shape of a B-2 bomber or manta ray.

-- There are "swinging" doors with no glass (?). A green, curving mound of what appears to be soil and grass is present.

-- There is a series of black and solid cube-like blocks stacked in no apparent order (attachment F). These blocks are reminiscent of black marble or similar stone.

-- There is almost a sterile feeling in some locales of this target. Other locations causes a tightening in one's chest.

-- There is movement of water through a tube-like or pipe-like containment system.

- (S/NF/SG/LIMDIS) Source C:

-- The site consists of a large red structure that has a large sign either on it or near it. The sign is white with red print and it is an advertising sign and it looks as though it has numbers on it. Two numbers looked like zeros. This large structure is in an area where there are other smaller structures that look like houses.

**STAR GATE**

**LIMDIS**

**SECRET**

-- There was a large object at the site that was thin at the bottom and was oval at the top (attachment G). This object could have electricity and sound was associated with it. This object stood alone and a little away from the structure.

-- There were smaller objects at the site that were triangular in shape and they flew in the wind. These objects could have been on the way to the site or near the site. They looked like kites or flags (attachment H).

-- I had a feeling of "up and down" and it seems that people walk up and down. It looked as though people were carrying things in their hands.

-- Children could be associated with the site.

-- Site could be near a shopping mall.

-- The site was a work place or a work environment. It was pleasant at the site.

-- The beacon person at one point sat down at a table inside a structure. The beacon person was wearing a nice ring. The beacon person was calm and could have been thinking of the word "calm".

-- Water is somehow associated with the site.

Subj:

Environment: Sitting at desk in normal work office with bright lights.

Object: Cover of advertizing brochure for a power boat. Picture of boat moving at high speed toward the upper right quadrant.

Comments: Tried to emphasize curve of bow, red stripe on foredeck; color and pattern of aft sundeck and direction of movement toward upper right quadrant. Also tried to emphasize noise of engine, concept of movement, and presence of two people in the cockpit.
